

On request: special glass to be used when the floodlight is aimed upwards with a tilt angle between 130° to 175°.
IMPORTANT: make sure the diffuser surface is free from dirt or other foreign material.

Included in standard supply: fibreglass nylon box with igniter. Fitted for insertion of power supply cable. Steel bracket with protractor scale. Aiming visor for precise aiming of the floodlight.

Upon request: with protective mesh for internal (subcode-0094)

Housing/frame: die-cast aluminium with cooling fins.

Diffuser: tempered glass 5 mm thick, resistant to impact and thermal shock.

Coating: graphite grey polyester powder coating, resistant to corrosive and saline environments.

Electric gear: wire terminated with admiralty brass clamps, silicone insulation with cross section: 1.5 sqmm 2P+T nylon terminal block (maximum allowed lead cross-section: 6 sqmm).

Equipment: supplied with knife switch enabling safe lamp replacement. Steel bracket with protractor scale and aiming visor. Retained steel screws with special anticorrosion and anti-gripping treatment. Igniter box thermally isolated from the housing. With gasket made of silicone platinum material.

EXTERIOR FLOODLIGHTS
